Sacci Hook

Art nr: 223429

Sacci Hook is an innovative solution for everyone who works with radiocontrols. Its developed with usability and ergonomics in focus.

With the Sacci Hook, we want to facilitate and streamline people's work and offer the opportunity to prevent incorrect loading and work injuries.

As the weight is distributed over both shoulders, you can reduce the harmful load on other parts of the body. The product is hung over the shoulder, without or with waist strap and is easy to put on and take off. The front plate can be adjusted in height to fit people of different lengths or user preferences.

This model has a solution for attaching radio controls with metal carabiners. These can be stepless adjusted sideways to suit many different controls with different attachment points. The carabiners fit attachment points with a cross section of max. 7.5x7.5 mm.

Sacci also has its own development and production of customer-unique holders if needed for specially designed adaptation.
